

Online Security Checklist

- Check the Internet to see if there is any information about your child**
 Go to a search engine like www.google.com
 In quotation marks, enter your child's name. To narrow the search, add a + and MN or city. Try your address, phone number, child's nickname to find out more.

- Check the Internet history**
 Check where your child has gone on the internet by checking the history. Press in Ctrl H or the history button. The history window will open on the side, you can click on the sites to see where your child may have been.

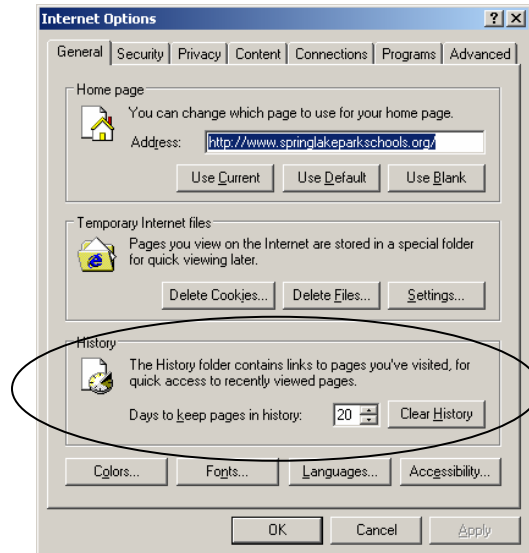

Checking History Archival Days

Go to Tools, Internet Options

On the General Tab, you can check the number of days the history is kept. Explore other options on the General Tab, such as Delete Cookies, Delete Files and Clear History.

Browse Online Social Networking Sites

Search to see if you can find information about children associated with the Spring Lake Park School District.

- www.myspace.com
- www.xanga.com
- For others see the resource page

Activate Content Advisor – (for this session, please use pass as the password)

With Content Advisor, you can give your children access to a specific list of Web sites that you allow and prevent them from accessing others.

Go to the following site for a tutorial on setting your Content Advisor in IE

<http://www.microsoft.com/windows/ie/ie6/using/howto/security/contentadv/config.msp>
